

Abstract

A detent connection piece (10) includes a clip hook (18) which can be pressed into a first bore (24) while being deformed until the detent connection piece snaps in and engages behind a bearing edge framing the first bore (24). The detent  
5 connection piece (10) additionally includes an end section which is adapted to be inserted into a second bore (26). Further proposed is a gas bag module including at least one such detent connection piece (10).
